

ECELLAR

FRENCH CONNECTED WINE CELLAR

AGEING CELLAR

Its technology recreates natural underground wine cellar conditions. Temperature, hygrometry, light, vibrations and air are controlled.

CONNECTED SHELVES

Equipped with sensors each shelf detects bottle additions and removals. Front lighting indicate, in the cellar, the bottle exact position, additions and removals.

WIFI CONNEXION

The wine cellar communicates via wifi with the Vinotag wine cellar management application. Thanks to this connection, Vinotag offers a real-time wine library on a smartphone.

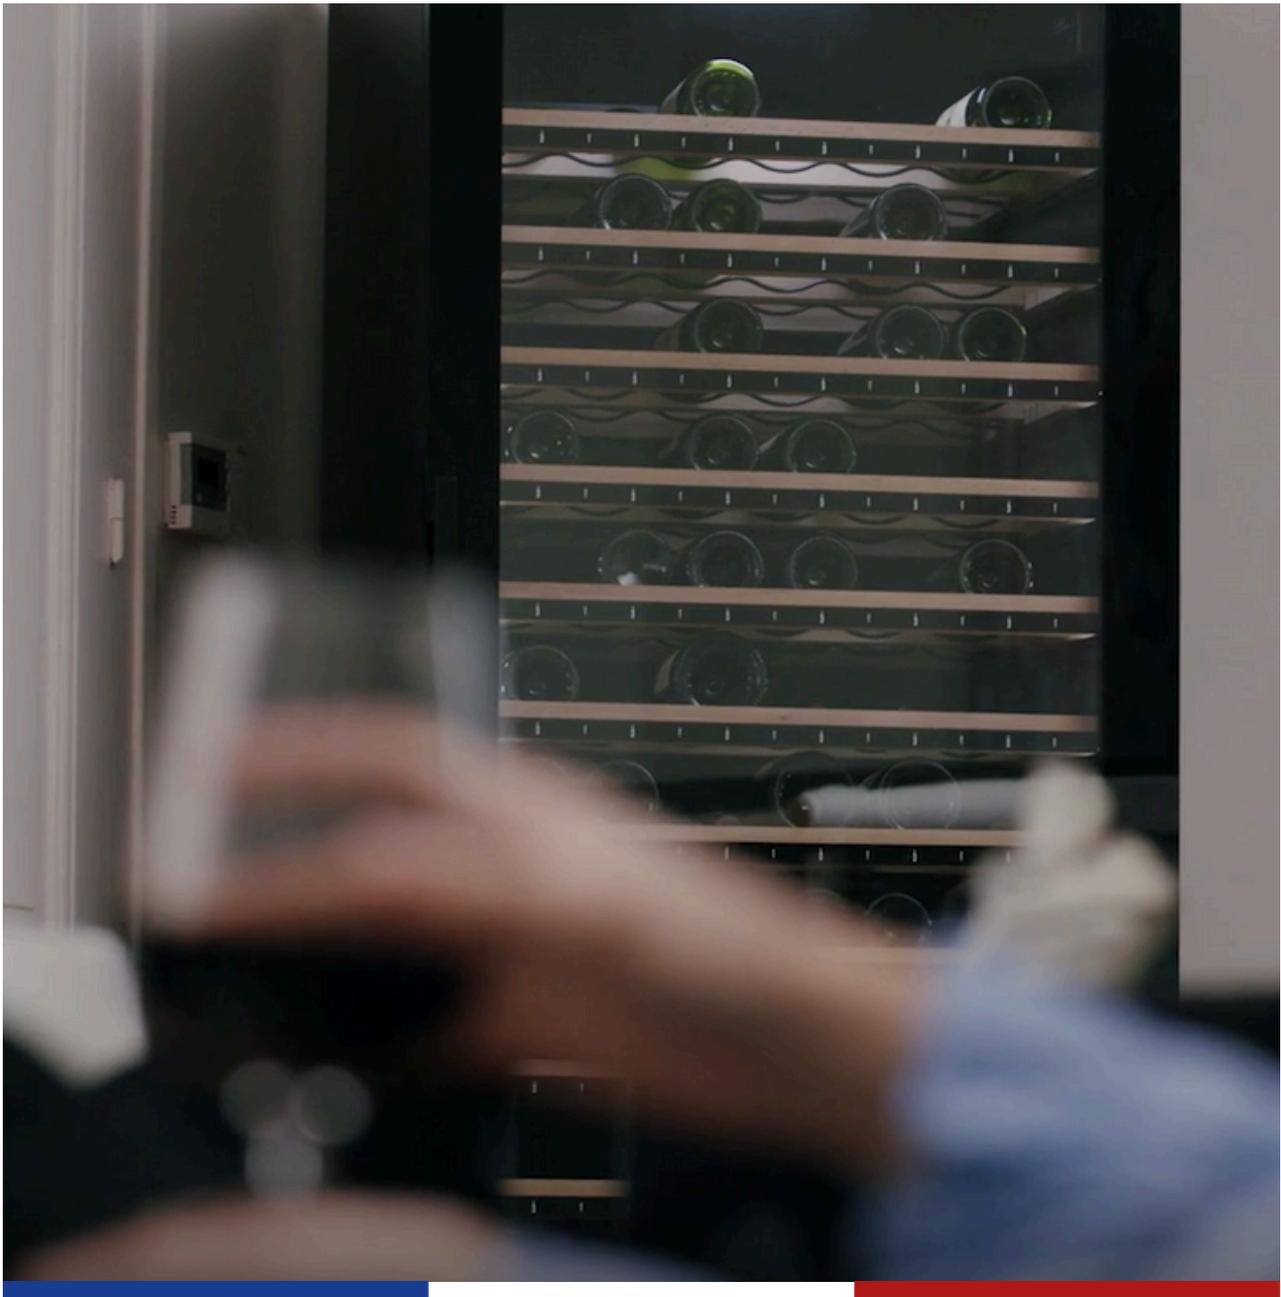

ALARMS

Thanks Vinotag app consult your wine inventory, schedule stock and peak date alerts.

DESIGN

Modern and seamless the design is perfect for interior. Glass door and LED lighting enhances the wine selection.

WINE EXPERT

Adopt the French lifestyle with made in France ECELLAR wine cellars. Technological jewelry developed by wine experts, it concentrates unique and patented innovation. Unique on the market, ECELLARS wine cellars are the first connected cellars in the world.

MADE IN FRANCE 

ABOUT US

Launched in June 2021 in France and Europe, the Ecellar is made in France and is the world's first truly connected wine cellar. It allows wine lovers to keep a clear, real-time inventory of their bottles, thanks to the free Vinotag®* smartphone application developed by the Frio Group and thanks to its unique connected shelf technology.

Its shelves are equipped with sensors and report each bottle movement in the Vinotag® application to keep a record in real time.

It also makes it easy to know the most optimal location for bottles, to locate them instantly, to find locations still available or to be alerted of peak dates or the need to restock a wine.

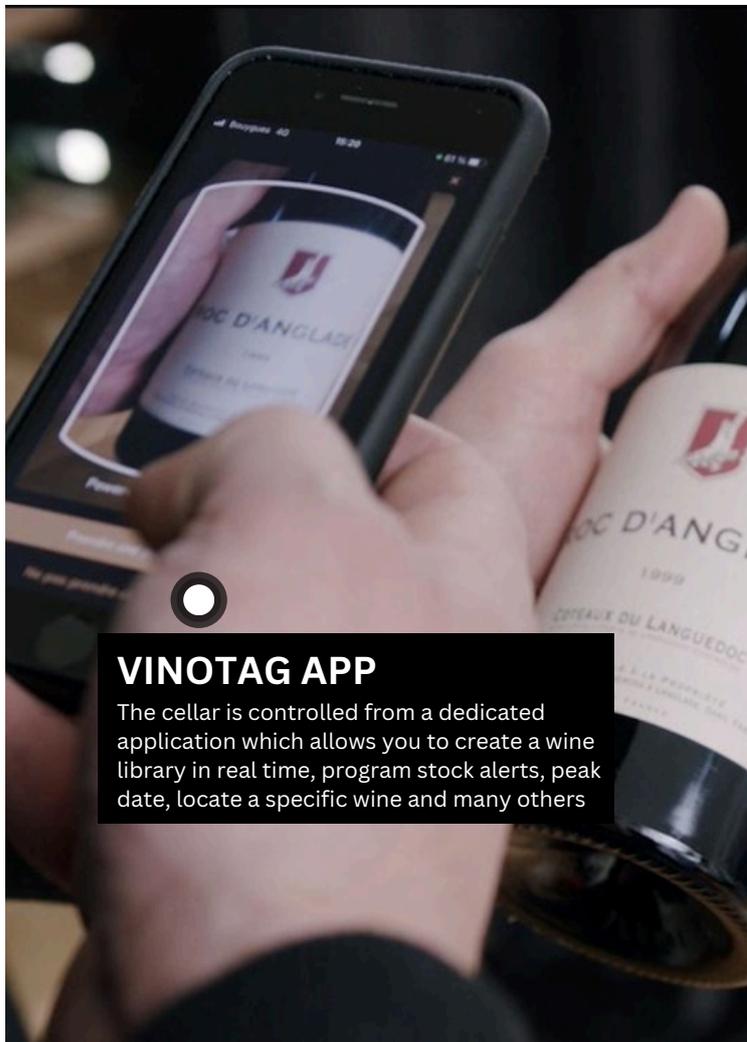

REVOLUTIONARY FEATURES

- **11 to 14 connected shelves, patented technology**
- **Dedicated wine cellar management application Vinotag®**
- **Instant detection of bottle additions and removals for a real-time wine register**
- **ESommelier® assisted placement technology and wine search function**
- **Stock level and peak date alerts**

“With these connected and intelligent cellars, made in France, we wanted to meet a need among wine lovers,” declared Didier Grychta, CEO of Frio. “Our ECellars are the only ones on the market to be truly connected thanks to their intelligent shelves and our specially developed Vinotag application. We are very proud that the Grand Prix de l’Innovation jury has rewarded this R&D work and this French innovation.”

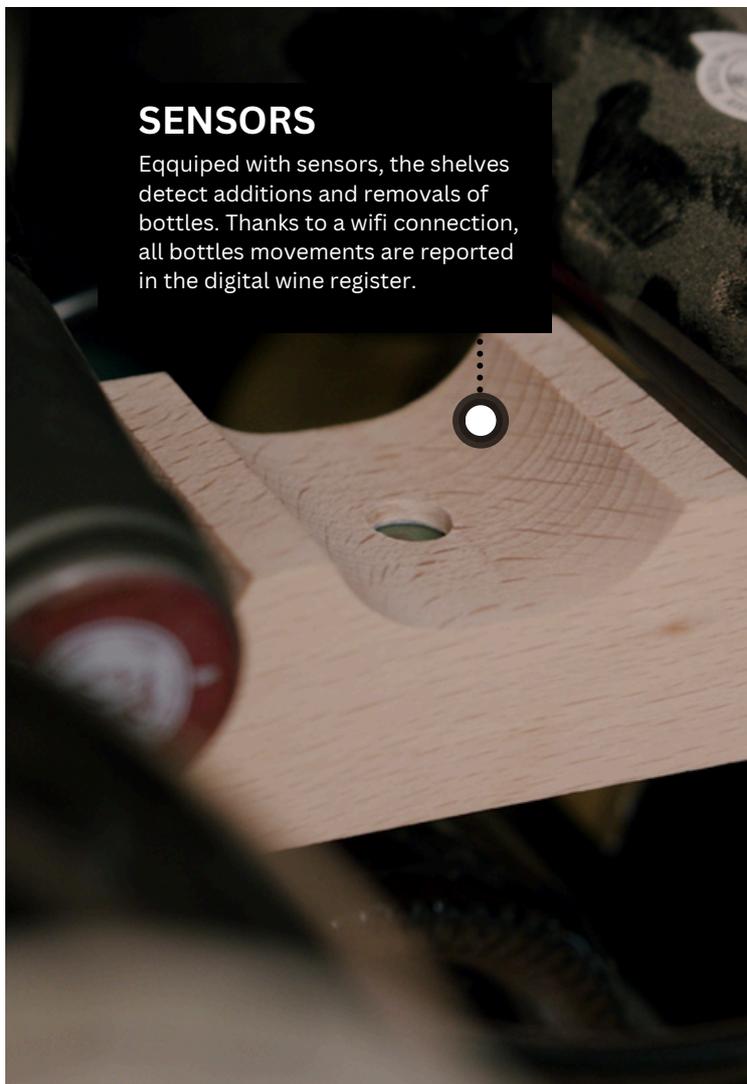

VINOTAG APP

The cellar is controlled from a dedicated application which allows you to create a wine library in real time, program stock alerts, peak date, locate a specific wine and many others

BOTTLE RECOGNITION

Identify a bottle of wine and generate a customizable wine sheet using a simple label picture. In partnership with

SENSORS

Equipped with sensors, the shelves detect additions and removals of bottles. Thanks to a wifi connection, all bottles movements are reported in the digital wine register.

BOTTLE LOCATION

Search a specific wine from Vinotag wine register, the ECELLAR technology directly indicates in the wine cellar thanks to a LED light the exact bottle location.
